

ASSOCIATE ENGINEER

APPLY HERE:

www.sejpa.org/work-with-us

ANTICIPATED STARTING SALARY \$107,506 - \$145,133

CAREER OPPORTUNITY:

San Elijo Joint Power Authority is seeking a motivated, detail-oriented, engineer who will be responsible for the full project lifecycle--from planning and design through construction and commissioning. The Associate Engineer will contribute to capital project delivery, asset management, regulatory compliance, and long-range infrastructure planning while working closely with operators, maintenance technicians, consultants, contractors and agency leadership.

Join a team where engineers have a direct impact on critical public infrastructure and the future of sustainable water management in North San Diego County.

MINIMUM REQUIREMENTS:

- Bachelor's Degree in Civil Engineering or related field
- 4+ years experience in wastewater or water industry
- 2+ years of project management experience
- Professional Engineer (P.E.) License is required.

EXAMPLES OF DUTIES:

- Manage in-house maintenance and capital projects
- Review, analyze, and conduct specialized technical studies and investigations
- Review and check construction plans, and oversee project implementation
- Prepare permit compliance reports
- Write monthly reports for management and the Board of Directors
